INTRODUCTION

Elon Inu, a meme coin, is a concept that mixes doge and Elon Musk, we seek to develop a community-based token that includes social media interactions with Elon and his followers. Meme coin is taking over the market in 2021, the most major explanation behind this is Elon Musk. Any penny is highly tied to him all booming a thousand times. This is a Binance based token working in the network BNB with a lot of other services to enchant the users. The users may purchase Elon Inu from Pancakeswap while making their wallets using BNB. Elon Inu will revolutionise the whole concept of Metaverse through its gamefi development.

We are developing a meme coin to establish a gamefi ecosystem. Elon Inu's secure system is intended to protect the assets of its customers, and the company is committed to benefiting them. Elon Inu will be a fair and secure platform that will assist the community in earning more money by providing them with equitable and fair opportunities. It will be an active project in collaboration with Metaverse gamefi, which will be in the development stage at the time.

ECOSYSTEM

Through its creative and strong ecosystem under Meme coin, Elon Inu promises to revolutionize the whole gaming system and process. Elon Inu contains revolutionary NFTs that will be exchanged via a novel and cutting-edge blockchain method. Elon Inu's ecosystem entails NFTs with its own NFT marketplace, Defi, Yield farming and Gamefi which are given below with the graphic details.

Elon Inu is a DeFi platform that aims to provide DeFi Solutions to consumers. DeFi (Decentralized Finance) is a means of offering financial services to customers via the use of smart contracts. Binance DeFi Staking invests on behalf of customers in particular DeFi items, accumulates and distributes realized income, and enables users to purchase DeFi goods with a single click.

Elon Inu will provide users low-cost access to fundamental banking services. It is comprehensive in scope, incorporating a set of cutting-edge technologies that are adaptable, immutable, transparent, and scalable. Elon Inu's financial system will eliminate many challenges faced by users today. It will exclude the intervention of intermediaries, a lack of accountability, insufficient liquidity, a high external variable effect, and inequality which is the vision of Elon Inu as well.

Elon Inu is a meme coin that provides its users with one-of-a-kind and valuable non-fungible tokens. The NFTs of Elon Inu introduced by Meme coin are extremely rare and unusual, as such NFTs have never been introduced before in the world of gaming. It is anticipated that the NFTs will carry information and other data that is directly tied to the gaming. NFTs may be assisted by a variety of persons or disciplines working together, thanks to shared financing and the equal advantages of Meme coin NFTs. Those that give data in NFTs will receive a predetermined sum of money based on the information they provide.

NFTS MARKETPLACE

Meme coin will be the first NFT marketplace to mainstream and standardise the gaming process, thereby globalising and opening up this multibillion-dollar industry through unique and creative approaches. With the required engagement and agreement of their owners, game players' data and records, as well as the research outputs of gaming researchers, will be exchanged on the Meme currency's NFT marketplace. They will get compensated in Meme money for their efforts when they make a purchase.

Elon In helps the consumers with NFT farming to make the platform for the users more beneficial for the users. Through the use of this farming approach, Elon Inu holders may be able to receive incentives and prizes. For example, people who invest in this process will receive a return on their investment in the form of transaction and trading commissions. Additional compensation is provided to users for their contributions to governance tokens, which is a new feature introduced this year. On the other hand, NFT farming is an emerging concept which entails staking NFTs in exchange for a reward or staking tokens in exchange for an NFT. It is the fusion of near-field communication (NFT) technology and decentralised finance (DeFi).

Elon inu decentralized platform which is a preferable platform for gaming as well. Elon Inu is gaining widespread attention from the cryptocurrency community as well as the largest gaming guilds in the industry. Through Gamefi, Elon Inu will provide the gamers with a bundle of opportunities to earn different rewards. Elon In will revolutionise the financial system in gaming and it will provide the users to earn through gaming on this platform.

PHASE 2

- CoinGecko Listing
- CoinMarketCap Listing
- 1,000 holders
- 2,000 Telegram Members
- 2,000 Twitter followers
- 3,000 Instagram followers
- Marketing Campaign

PHASE 4

- 10,000 holders
- 15,000 telegram members
- Offline Marketing (Bus, Taxi)
- Tier 2 Exchange Listing

PHASE 6

- 50,000 Holders
- 100,000 telegram members
- Elon Inu metaverse game launch
- Celebrity collaboration

PHASE 1

- Website launch
- Social Media Launch
- Telegram Group Launch
- Dex Launch

PHASE 3

- 5,000 holders
- 5,000 telegram members
- Reddit Community
- Billboard Campaign
- Whitepaper Release
- Contract Audit
- Bridge Chain Launch
- Tier 3 Exchange Listing

PHASE 5

- 20,000 Holders
- 25,000 Telegram members
- 1-million-dollar marketing campaign
- Elon Inu Metaverse beta
- Elon NFT launch
